SUMMARY

Engineering Leader and Solution Architect with 19 years of experience delivering impactful software solutions across **Mobile Security, Travel, Energy, Electric Vehicle and Telematics** domains. Proven expertise in developing apps for **Installer's Toolkit, Mobile Security, Battery Management Systems**. Renowned for **orchestrating end-to-end product development**, leading high-performing Agile teams, and creating **customer-centric innovations**. Passionate about solving complex technical challenges with innovative approaches.

"I hired Sudarshan at Enphase to lead ITK engineering team. Installer ToolKit is a key mobile application to help installers commission the Enphase system for customers. Sudarshan played a key role in migrating the application to latest tech stack for iOS, Android and backend services and resolve critical customer issues to improve overall customer experience. This helped in significantly improved app rating. Sudarshan is technically sound, hardworking, and extremely good team player. It was a pleasure working with Sudarshan and I wish him all the best for future endeavours." ~ Ashish Bansal, Vice President, Enphase Energy, Bangalore, India.

SKILLS

Technical Leadership: Native Mobile Development (iOS, Android), Cloud apps, IoT/Telematics Security

Team & Process Management: Agile, Scrum Practices, Cross-functional Collaboration, Hiring, Performance Reviews

Technical Expertise: Swift, SwiftUI, SwiftData, Core Data, BLE/Wi-Fi Protocols, Secure Software Development

Architectural Design & Practices: UML, MVC, MVVM, VIPER, CICD, Code Reviews

EV & Energy Solutions : Battery Management Systems (OCPP, MQTT), Solar Energy Solutions for Installers

EXPERIENCE

CAR Software Systems | EV.Engineer (Startup)

Software Consultant (EV)

Bangalore, India

Dec 2024 - Present

- Leading the architectural design and POC of innovative solutions for **Battery Management Systems**.
- Collaborated** with clients to design cutting-edge products addressing challenges in EV infrastructure.
- Revolutionised** EV battery performance analysis by integrating AI-powered solutions, optimising battery health and life cycles.

Enphase Energy Private Limited

Sr. Engineering Manager (iOS, Android, Cloud)

Bangalore, India

July 2021 to Dec 2024

- Directed** a team of 30+ engineers to deliver impactful solar energy solutions. | [Installer Toolkit App](#) (Rating:4.3)

- **Spearheaded** ITK TechSupport AI, leveraging **Generative AI** to enhance customer support.
- **Architected** and executed project roadmaps, **streamlining processes** and improving code quality through comprehensive reviews.
- **Optimised** app usability by implementing features such as **IQ Gateway, IQ Battery, Provisioning and Functional Validation**
- **Amplified** product adoption and user satisfaction through continuous feature enhancements and bug fixes.

McAfee Software Private Limited

Engineering Manager (iOS, Android)

Bangalore, India

October 2011 to July 2021

- **Orchestrated** the development of [McAfee Mobile Security](#) for iOS from scratch (Rating: 4.7).
- Delivered **transformative security features** such as VPN, jailbreak detection, secure vault, and location tracking.
- **Governed** Agile practices as a **Certified Scrum Product Owner**, managing backlogs, roadmap planning, and analytics tracking.
- **Catapulted** app downloads to over 3M by employing a customer-centric approach to feature delivery.
- Designed and implemented a **telematics app** to analyze vehicle driving patterns, enhancing safety and security.
- **Achieved over 3M direct app downloads** with a customer-centric approach to feature delivery.

Previous Roles

Held key technical positions at eNovate Media Solutions, Ness Technology (Amadeus), NMS Communication contributing to software innovation and technical excellence from 2005 to 2011.

EDUCATION

BE – Information Technology (Distinction across all semesters)

National Institute of Technology Karnataka (NITK), Surathkal

June 2001 to May 2005

CERTIFICATIONS

- Electric Vehicle Engineering and Development (IIT Madras - CODE) In Progress - April 2025
- EV & Renewable Energy and Storage (IIT Madras - NPTEL) In Progress - Dec 2025
- Generative AI Certification – Google Cloud Skills Boost, AWS
- Certified Scrum Product Owner (CSPO) – Scrum Alliance

ADDITIONAL INFORMATION

- Organised and delivered workshops on cutting-edge topics like IoT, and Telematics Engineering, fostering technological awareness among students, professors and professionals.
- Recipient of McAfee, Ness Spotlight Awards for CSR, innovation and performance excellence
